Office Action Summary

Art Unit: 3739

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 39-66 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Zeimer (US '942).

Zeimer (US '942) provides the teachings set forth in the previous office action.

Applicant's arguments have been considered, but are not persuasive Zeimer (US '942) specifically states that after the therapeutic agent is released, time is allowed for the normal vessels to clear before the agent is activated (see the paragraph spanning columns 4 and 5).
